- 🌐 Two key drivers of materials Growth:
 - Legacy (> 65nm)
 - IoT / Consumer
 - Leading Edge
 - Big Data and AI
- 🌐 China a market disrupter / game changer
- 🌐 Economies - Huge influencing factor

MegaTrends Details

- 🌐 Legacy Fabs producing devices 150/200mm are at maximum capacity and continue to grow
 - 150 mm wafers saw a huge growth in 2017/2016 of > 30%
 - 200 mm healthy growth constrained by availability 6.5%
- 🌐 45% of all devices are 65nm and larger nodes

Legacy Device Mix growing 6-7%/yr (MSI)

China

- 🌐 **China is becoming a market disrupter - coming on strong**
 - Huge government & private investments driving new fab growth
 - Phase I: \$21B (65% to be allotted for IC mfg) Population of up and coming consumers the big carrot -> 1.4B people
 - 20 new 200 mm fabs being build 2017-2019
 - China makes ~16% of the chips they consume
 - Major share of raw materials markets
 - Chip trade balance will be impacted by these fabs looking to sell
- 🌐 **Tariffs on products imported from China and those exported from China will continue to be a concern.**
 - Tariffs - a concern for buyer and sellers

China's influence on the Metals & Minerals

- China's raw materials resources will be the limiting gate for metals/sputter target production as China's economy further expands

	China Supplies X % of WW Supply	Consume Y% of WW Supply	Major semi-raw material supply country
Aluminum	54%	63%	Various
Titanium	33%	63%	China
Tungsten	82%	48%	China
Rare Earths	82%	Nd	China

- China domestic raw materials sources of fluorspar, phosphor rock continuing concerns.
 - Anhydrous hydrofluoric acid price showed a sharp rise in the first half of 2017 in China. The average price increased from 6,366 yuan/ton at the beginning of the year to 11,090 yuan/ton at the end of June, up 74.19%.

MegaTrends Details – Leading Edge ($\leq 45\text{nm}$)

- 🌐 Logic devices MSI growing at 6% CAGR (2017-2022)
- 🌐 Memory growth (DRAM/NAND) – 3D device ramps will continue to accelerate materials growth at 6.5% CAGR
- 🌐 EUV materials challenges and opportunities
- 🌐 Novel materials not expected until 5nm or later
- 🌐 China – 13 new 300mm fabs coming on by 2019

How long can I ride this wave?

GDP Growth Expected to Moderate

The Market is hot but will it last?
