# AUTHOR BIOGRAPHIES

**Lita Shon-Roy** – President/CEO and Founder of TECHCET— has worked throughout the semiconductor supply chain, leading strategy, business development, marketing and sales for chip designers, equipment OEMs, and material suppliers for over 30 years. She has spent most of her career focused on business development and market strategy of electronic materials and equipment. She has developed new business opportunities for companies such as RASIRC/ Matheson Gases, Air Products & Chemicals, and IPEC/Speedfam, and lead marketing and sales in companies such as Air Products, and Brooktree/ Rockwell. Ms. Shon-Roy is considered one of the leading experts in electronic materials market analysis and business development. She has authored and co-authored 100's of articles, reports and texts on semiconductor process materials markets, trends, and worldwide supply chain issues. She holds an M.B.A. from California State University, Dominguez Hills, an MSEE with specialty in Solid State Physics from the University of Southern California, and a BS in Chemical Engineering from UC San Diego.

**Dan P. Tracy, Ph.D.** – is TECHCET's Sr. Director of Market Research, expert in materials market analysis with a focus on sputtering targets, deposition and packaging materials. He has over 30 years of market analysis experience covering semiconductor packaging, thin films, semiconductor process equipment, and semiconductor materials. He has particular expertise in analyzing dependencies between equipment and materials, and between the front- and back-end of the semiconductor industry, including insights pertaining to LEDs, MEMS, and sensors. Prior to TECHCET he led the Industry Research & Statistics group at SEMI as Sr. Director and worked for Rose Associates covering electronic materials as a Sr. Analyst. Additionally, Dan has a background in packaging engineering from National Semiconductor. He holds a Ph.D. in Materials Engineering from Rensselaer Polytechnic Institute, a MS in Materials Science & Engineering from Rochester Institute of Technology, and a BS in Chemistry from SUNY College of Environmental Science and Forestry.
