**Kevin McLaughlin, Ph.D.** – Senior Business Development Director at TECHCET – covers program management and business development consulting. He joined TECHCET after spending 10 years at SACHEM as Business Director, Electronic Materials where he was responsible for business management, strategic and product marketing in the electronics industry including IC, packaging, panel display, and printed wire board applications. Prior to SACHEM, Kevin worked at ATMI (later purchased by Entegris) as Segment Manager, Surface Preparation Technologies, directing product development and marketing for wet process applications. During an over 25-year tenure in the semiconductor industry, Kevin has also worked in process engineering, account management, and marketing positions with equipment and materials suppliers including STEAG Electronic Systems, Tokyo Electron, Mattson Technology and SCP Global Technologies. Prior to that, Kevin spent eight years in R&D, technical service and marketing positions with Vista Chemical and Alcoa Industrial Chemicals. Kevin holds a B.S. degree in Chemical Engineering from Purdue University and obtained his M.S. and Ph.D. degrees in Chemical Engineering from the University of Texas at Austin.

**Xiren Qu** - Jr. Analyst, focused on end use market research, modeling and profiling of material suppliers. She also provides customer support to Asia customers. Xiren has a B.S. in Mathematics & Economics from the University of California, San Diego.

**Lita Shon-Roy** – President/CEO and Founder of TECHCET—has worked throughout the semiconductor supply chain, leading strategy, business development, marketing and sales for chip designers, equipment OEMs, and material suppliers for over 30 years. Her experience spans from process development of flat panel displays to business development of metal organic precursors. She developed new business opportunities for companies such as RASIRC/Matheson Gases, Air Products & Chemicals, and IPEC/Speedfam, and managed marketing and sales in companies such as Air Products/Schumacher, Brooktree/Rockwell, and Hughes Aircraft. She has authored and co-authored articles and texts on semiconductor processing, materials market trends, and worldwide supply chain issues as related to the world economy and is considered expert in electronic materials marketing and business development. She holds an M.B.A. from California State University, Dominguez Hills, an M.S. in Electrical Engineering from the University of Southern California, and a B.S. in Chemical Engineering from University of California, San Diego.
